

LIGHTING TIPS & TRICKS

- Unpretentious with understated detailing, the Braiden collection highlights an American Casual style, which is influenced by updated American country and Shaker styles. American Casual is comfortable, warm, inviting and homey and blending traditional and casual transitional decors.
- Use ENERGY STAR CFLs in the fixtures that are hard to reach, such as ceiling fans, other ceiling fixtures and enclosed outdoor fixtures. Because CFLs last longer, you will enjoy the convenience of buying and changing bulbs less frequently.
- Mix and match flexible, adjustable track heads and mini-pendants to showcase the items that make your home unique. With a wide variety of glass colors and body styles, the Illuma-Flex track lighting system can enhance the ambiance of any room.
- Decorating your bath and vanity areas with lighting not only can turn your precious downtime into a luxurious experience, but can also prepare you for the day ahead. You can actually reduce the shadows on your face when you look in the mirror by mounting recessed downlights 24" to 36" on centers between the face and the mirror.
- Urban Casual is a top decorative trend that features a minimalist style with classic design influences and monochromatic graphic elements for a subtle surprise. With unique oval glass and white-on-white abstract floral pattern, the Chloe collection is a great example that highlights the Urban Casual look.
- Mount Progress Lighting's LED mini-pendants over a kitchen island to make activities on the counter, such as chopping chives or correcting homework, easier for you and your family members. Or add LED step lights around the island to keep loved ones from bumping into the area when tiptoeing in the kitchen for a midnight snack.
- Global Fusion – as seen in the Brisas collection – showcases an eclectic, casual style, blending design elements from around the globe. Colors, fabrics, art, and objects are inspired by travels. This style also often mixes traditional European and Asian design styles with elements from disappearing cultures.
- The Soft Modern style – as seen in the Westin line – highlights clean lines, sculptural furnishings, art, neutral elements and bold color to underlie the simplicity of line, shape and form.

LIGHTING TIPS & TRICKS

- The Glamour trend can be seen in Progress Lighting's Noir collection. This style highlights restored urban dwelling architectural elements that fuse well with Art Deco design and Hollywood-inspired details that highlight a dramatic use of contrast.
- Use wall sconces to illuminate hallways or to provide general perimeter lighting. By incorporating ENERGY-STAR qualified wall sconces into your lighting scheme, you can add a touch of decorative wall lighting while saving energy in your home.
